# MiracleFleet
for NAV

Introduction

Managing a fleet can be a complex task and for many businesses the cost of running a fleet could be one of the largest expenses they have after payroll. In the current climate, it's important to look for ways to keep costs under control and to ensure that unnecessary costs are avoided. Our Fleet Management solution, Miracle Fleet will help businesses control and manage all aspects of Fleet Management both efficiently and cost effectively.

We understand that having the correct information available will enable you to improve your operating efficiency, drive down costs and ultimately save time. MiracleFleet is a flexible, configurable solution which is designed as an add-on to MiraclePeople, however it can be implemented on its own or fully integrated with your standard Microsoft Dynamics NAV system.

Functionality

MiracleFleet builds upon the employee and vehicle data held for P11D purposes to provide a total vehicle management system covering all company vehicles. The solution will provide control for all aspects of Fleet Management from the point of a requirement being perceived through to acquisition, operating, maintenance and disposal. You will be able to record details of all your company vehicles from cars, vans, heavy goods vehicles (HGV) etc, including:

- Drivers and Vehicle Allocation
- Acquisition Information
- Technical Information
- Warranty Claims
- Service and Repairs
- Tyre Management
- Events i.e. accidents, speeding fines, parking fines, etc.
- Disposal

Functionality

This add-on module to MiraclePeople builds on the employee and vehicle data held within the HR system to provide a fully comprehensive Vehicle Management solution. Data entered within HR is automatically updated to MiracleFleet and vice-versa where both modules are deployed. Options exist to integrate to MiraclePay Enterprise as well where an employee may contribute to a car lease or to recover speeding or parking fines.

Fleet Maintenance provides for the full life cycle of the management of a company's vehicles from cars through to HGV and articulated vehicles where required.

Record and manage information on drivers including:
- Driving licence including endorsements and points
- Medical details
- Vehicle preferences
- Fuel usage

Record and manage information on vehicles including:
- Type/class of vehicles
- Registration details
- Acquisition details
- Insurance Data
- Maintenance Data
- Disposal details

Utilise MiracleFleet to automate management processes including:
- Review of drivers licences
- Scheduling of vehicle maintenance
- Monitoring of costs
- Monitoring insurance renewals
- Checking fuel usage/efficiency
- Recovery of speeding and parking fines
