

You'll be in safe hands with Miracle, our experts will support your journey to trouble free payroll and HR management.

Simplytimesheets for NAV

Introduction

At Miracle we have partnered with Simplytimesheets to provide our customers with electronic timesheet functionality to enable the tracking of both simple and complex time-tracking scenarios. Using a paper based system is time consuming and difficult to track. A lot of hours are wasted in chasing completion and authorisation. Data ends up being moved from one spreadsheet to another, leaving businesses open to errors. By working with Simplytimesheets, we can provide full integration and send data directly to the Miracle Payroll module.

Functionality

- Software as a service timesheet model
- Administration functionality to include administrators, employers, supervisors and contractors
- Ability to create a timesheet to a specific group with specific permissions
- Timesheets - view list of approved and awaiting approval timesheets
- Ability to view timesheet history
- Ability to search for timesheets
- Ability to apply different timesheet templates to record different data
- Expense module to record expenses with the ability to upload attachments
- Integration with MiraclePay
- Ability to create custom timesheet reports on a per customer basis
- Ability to export reports to multiple formats
- Ability to view invoicing history (SaaS invoices)
- Ability to update credit card details
- Ability to change the look, colours and style of the system within settings
