

## MiraclePay Enterprise

Running a payroll department is rarely a simple task. It can be incredibly demanding, complex and fraught with challenges. It's important to look for a payroll solution that can help you meet these challenges, whether they are concerning compliance, obtaining accurate and real-time reporting, ensuring confidentiality, integration, accuracy or flexibility.

If you have a clear understanding of the challenges you face, you need to ensure your business has the appropriate resources and solutions to deal with them.

At Miracle, we have designed our payroll solutions to meet the increasing demands made upon today's payroll departments. We know that payroll is increasingly driven by the complexity of new legislation and we recognise the need to meet these challenging changes. We have designed our payroll solutions to help our customers increase productivity, reduce administrative workloads and improve accuracy.

### Product Overview

- Multi-company
- People-centric design - single person record for multiple periods of employment
- Security management - controlled by company or payroll
