

MiraclePay P11D

Introduction

MiraclePay P11D provides the means to capture employee benefits and expenses data which is required for year-end reporting. This can be done either as part of the employee's benefits as set up in the HR system or as a stand-alone option that feeds payroll.

The P11D data can be sent to HMRC either in paper format or electronically via the Government's e-government gateway. A printed copy for the employee and/or the employer's files can be produced independently of the HMRC submission.

Functionality

The P11D module is an optional 'add-on' to MiraclePay Enterprise and MiraclePeople and provides the following functionality:

- Unlimited entries within each benefit type
- Free-format report - HMRC approved
- On-line P11D filing
- Company cars
- Mileage allowances
- Living accommodation
- Company loans
- Medical care
- Assets
- Expenses
